EXECUTIVE SUMMARY

Engineering and Management Student with a year of practical work experience focusing on structural design. Structural analysis and design for projects in schools across Toronto requiring familiarity with Ontario and National Building Code and the use of software such as SAP2000, Revit and AutoCAD. Operates efficiently in team environments; often coordinating with multi-disciplinary stakeholders.

PROFESSIONAL EXPERIENCE

Toronto District School Board May 2018 – August 2018	Structural Engineering Assistant Prepared structural and architectural drawings using AutoCAD and Revit. Projects include exterior steel stairs, wall replacement, beam replacement, interior steel platforms, wall waterproofing and weeping tiles complete with weld and anchor specifications. Use of SAP 2000 and hand calculations to determine shoring loads, beam selection, capacity of roof structures with snow loads and connections. Designed structural guards and prepared shop drawings for awning windows to be stamped and implemented across TDSB schools.
Toronto District School Board May 2017 – August 2017	Structural Engineering Assistant Designed supports for hatches and specified compliance issues and roof access solutions to over 60 schools. Reviewed as-built drawings for over 600 TDSB schools to identify potential Siporex and cluster column issues
Toronto District School Board May 2016 – August 2016	Environmental Engineering Assistant Reviewed Designated Substance Surveys for over 600 sites for a GIS management system Appraised TSSA directives for gas systems to conform with CSA B149, O.Reg 212/01 & 214/01

EDUCATION

McMaster University Graduating in 2020	Bachelor of Engineering & Management Fourth year in a five year Civil Engineering & Management program crediting one year towards an MBA Current GPA of 11.80 on McMaster's 12 point scale (3.9 on 4 point scale)
Nanyang Tech University 2018	International Student Exchange Recipient of Travel Scholarship to study at NTU, an internationally renowned university for Civil Engineering

TECHNICAL SKILLS

- *LEED Design*: GA Certification acquired
- *Structural Design and Analysis*: SAP 2000, Revit
- *Drafting and 3D Modeling*: AutoCAD, Revit, AutoCAD Civil 3D, 3DS Max, V-Ray
- *Data Analysis*: Matlab, MS Excel, Minitab
- *Surveying*: Use of Total Stations and Matlab for plotting/analysis
- *Programming*: Python, Javascript, HTML
- *Photo, Video, Document Editing*: Photoshop, Sony Vegas, Acrobat, MS Office Suite

RECENT PROJECTS

Beach House Design in the Philippines **2018**

- Independently designed a cost effective beach house available to impoverished villagers in Toledo, Philippines. Visiting the community allowed me to design with vernacular architecture in mind. Revit model, CAD drawings and construction photos available on davidmicmoore.wixsite.com/design

3D Design of Portable House **2018**

- Structural and Architectural design and video game walkthrough of a conceptualized portable home with SIP panels. Designed in Revit and imported to 3DS Max Interactive for game-like walkthrough.

Troitsky Bridge Building Competition **2017**

- Team Leader in charge of designing model bridge to withstand hydraulic press loading

Hackathons **2016, 2017**

- First at McGill RoboHacks 2016 competition for creating a gesture-controlled model car
- Nominated Best Hardware Project at HackHarvard 2017 for interactive projection

AWARDS

- Ontario Professional Engineer Scholarship:** \$1500 acknowledging leaders in engineering affairs
- The Hatch Academic Grant in Engineering:** \$2000 awarded for a high sessional average of 11.9
- Ronald William Merkel Engineering Scholarship:** \$2500 recognizing international relief projects
- 2nd in McMaster Design Competition:** Subsequently offered opportunity to attend OEC 2017
- University Prize for Special Achievement:** Acknowledging my Philippines beach house project
- H.L. Hooker Scholarship:** \$1500 awarded for attaining an 11.9 GPA
- Simon McNally Scholarship:** Recognizing practical civil engineering experience and background
- McMaster Honour Award Scholarship:** \$1000 value for a high school GPA of 94%
- Chemical Institute of Canada Award:** For astounding scientific process in carcinogen research
- Gold Medal at Toronto Science Fair:** Research on antioxidant effects on heterocyclic amines
- Offered **Undergraduate Research Award** at Ryerson for researching High Performance Concrete

EXTRACURRICULAR ACTIVITIES

McMaster Civil Engineer Ambassador: Representing the Civil Department	2018– Present
Third Degree Black Belt: Instructor and Competition Judge	2010 – Present
McMaster EERI Seismic Design Team: Design Lead	2018 – Present
Concrete Toboggan Club: Concrete design and testing supervisor	2016 – Present
Habitat For Humanity: Build Crew Member	2016 – Present
NTU Dive Team: PADI Open Water Dive Certified	2018
Lane Attendant at Kennedy Bowl: Repaired pin-setting machines and assisted leagues	2013 – 2015
McMaster Engineering Society: Student Member	2015 – Present
High School Green Team: President & Event Coordinator	2015
